### Name of the material

Kinds of Research

### Sources

### Purpose of the material

To help educators to identify and understand the key differences between the various types of educational research;

To act as an introduction to research for those educators who may be unfamiliar with academic research;

To help those leading research in institutions to support their colleagues.

### Material

Online copy of the resource

A computer and Internet connection

30-45 minutes to deliver

### How you can use this material in your practice

This is useful for those leading Practitioner Inquiry, in order to help to train teacher inquirers. It is also useful as a reference tool for teachers new to inquiry methods.

### Debrief - reflection and metacognition

#### Feedback on the use of the tool

Feedback from teachers new to inquiry has been very positive: some quotes from feedback: “I really only had a vague idea about the various types of research. This made it so clear.”

“Now I feel that I have a way forward and I know (I think!) what I am doing with my research”.

“This gave me a really clear aide about how I’m going to present my own research.”
